Projects

Real-Time Bus Tracking System | *Flask, Firebase, Leaflet.js, JavaScript* **Sep'25**

- Built a web application to track buses in real time across multiple devices using GPS data and Firebase Realtime Database.
- Implemented live updates every 2 seconds with automatic synchronization of location data across clients.
- Integrated Leaflet.js for mapping, enabling real-time visualization of moving buses on interactive maps.
- Developed backend with Flask to manage API requests, data flow, and communication between database and frontend.
- Deployed the system using Firebase Hosting, resolving issues with redirects, test mode rules, and deployment configurations.
- Repository Link: **https://github.com/Priyansh-100/Routex**

Dice Game Simulation | *Java, Java Swing, Object-Oriented Programming(OOP)* **Jun'25 – Jul'25**

- Developed a multi-player dice game application featuring both a command-line interface (CLI) and a dynamic graphical user interface (GUI) using Java Swing.
- Applied Object-Oriented Programming (OOP) principles to structure the application, creating distinct classes for Player, Dice, and GameEngine to ensure the code is modular and maintainable.
- Engineered an interactive GUI that provides real-time updates on player rolls, round winners, and overall scores, enhancing the user experience.
- Repository Link: **https://github.com/Priyansh-100/Dice-Game**

Training

Summer Training | Problem Solving with Data Structures & Algorithms using Java **Jun'25 – Jul' 25**

CipherSchools

- Implemented fundamental data structures in Java, including **Arrays, Stacks, Queues, Linked Lists, Trees, and Graphs**.
- Mastered key algorithms for **sorting, searching, and graph traversal** (e.g., Merge Sort, Quick Sort, BFS, DFS) to solve complex computational problems efficiently.
- Analyzed algorithm performance by applying **time and space complexity analysis (Big O notation)** to write optimized and scalable code.
- Solved over numerous **coding challenges** on platforms like LeetCode, applying learned concepts to tackle real-world programming problems.

Certificates / Certifications

Problem Solving with Data Structures & Algorithms **June'25**

CipherSchools

Link :- https://www.cipherschools.com/certificate/preview?id=6881f4bdca64e035786b1698

Skills

Languages Python, SQL, HTML, CSS, JavaScript

Technologies/Frameworks: NumPy, Pandas, Seaborn, Matplotlib, MySQL, Firebase, Node JS, Git, GitHub

Domain Skills: Web Development, Backend Development, Real-Time Systems, Databases & Cloud, Deployment & Hosting

Education

Lovely Professional University **Since Aug' 2023 – Present**

Bachelor of Technology - Computer Science and Engineering — CGPA: 8.2 *Phagwara, Punjab*

Nosegay Public School **2022 – 2023**

12th — Percentage: 89 *Khatima, Uttarakhand*

Nosegay Public School **2020 – 2021**

10th — Percentage: 78 *Khatima, Uttarakhand*
